Boab
Health Services

What is the Integrated Team Care (ITC) program?

The ITC program supports Aboriginal and Torres Strait Islander people with complex chronic care needs. This program was formerly known as the Closing the Gap (CTG) program.

Benefits of the ITC program

Managing long term illness can be difficult and stressful. The ITC program is able to support clients with chronic conditions, who need additional care from a range of health and specialist services.

What we can provide?

Care coordination support

We will support you and your doctor in line with your care plan.

Education

We provide education to help you better understand and self-manage your condition.

Financial Support

We can support you by purchasing certain equipment and medical aids that will help manage your condition (as outlined in your care plan).

Practical Assistance

We can support you to attend appointments with health specialists and support services in line with your care plan.

To join, you will need to:

- 1 Identify as an Aboriginal or Torres Strait Islander person
- 2 Have a chronic condition
- 3 Have a care plan (GPMP or Team Care Plan) for your chronic condition

What is a chronic condition?

A chronic condition is a disease or sickness you have lived with for a long time. Chronic conditions include diabetes, heart disease, kidney disease, lung (breathing) disease, mental health conditions or cancer.

What is a GPMP or TCP?

General Practitioner Management Plans (GPMP) or Team Care Plans (TCP) are written by your doctor and take about 45 minutes to complete. They are a plan for you and your doctor to best manage your condition. They include referrals to other health professionals and specialist services.

Referral to the ITC program

To join the ITC program you need to have:

- 1) a current care plan completed by your doctor;
- 2) an ITC program referral form completed by your doctor.

Your doctor will send these documents to Boab Health Services. We will contact you once we have received this information.
